

## Inspector – Bactoforce France

To be responsible for carrying inspection activities primarily in France, Bactoforce is now looking for an independent and self-motivated person to be based in the North or North West part of France.

Bactoforce is today the leading European supplier of integrity inspections of processing equipment in the food sector, and we are today servicing some of the leading food brands in Europe. In response to a growing interest from French food producers, we are establishing a local subsidiary with the aim to be able to serve the local food sector from a local presence.

For more information about the company and our activities, please visit [www.bactoforce.com](http://www.bactoforce.com).

Your primary activity will be to perform inspections in the area, but in addition, you will participate in building up and maintaining customer relations. As we are expecting to expand our activities in the France, you will also be involved in the general development of the local operation in cooperation with Area Sales Manager and the headquarter in Silkeborg, Denmark.

### **Your primary responsibilities will be:**

- Performing inspections in France and occasional support to other areas.
- Participate in planning/coordination of inspections
- Taking responsibility for for maintaining the condition of own inspection and safety equipment
- Participate in ongoing business development of our local activities

### **We expect you to have:**

- Relevant education in food technology, incl. having a good understanding of production processes / -equipment and microbiology,
- Experience in food production, preferably from the dairy sector
- An open mind to solving challenges and meeting new people
- A proven ability to work independently and to manage own tasks,

You will be joining an international organisation, where English is the corporate language.

### **We offer:**

In the position as Inspector in Bactoforce, you will join a team of experienced and motivated people in an expanding company. Your point of reference will be to the Area Sales Manager of Bactoforce France. You will gain a broad network in the food sector. Bactoforce offers a position with opportunities to participate in and influence the development of the local activities.

For questions about the position, please contact Area Sales Manager, **Erwan Fouquereau**, on phone no. [+33 645 837 050](tel:+33645837050) or via email to [erwan.fouquereau@bactoforce.com](mailto:erwan.fouquereau@bactoforce.com)

Please forward your application in English to Bactoforce France

## Job description

As Inspector in Bactoforce France ("the Employer"), the overall task of the Employee is to perform inspections at the customer's production facilities in accordance with the decisions and guidelines made by the Management of Bactoforce France.

The Employee being an Inspector is expected to:

- a) Perform inspection in accordance with the Employer's quality handbook. Inspections will predominantly be carried out in the area covered by Bactoforce France, but the inspector may also be asked to support other Bactoforce companies in other areas.
- b) Coordinate own inspection visits in cooperation with the Area Sales Manager and the customer. This includes participating in following up with customers on planned/ scheduled or performed visits.
- c) Prepare inspection reports to customers in relation to the internal Bactoforce guidelines and deadlines,
- d) Work with the Bactoforce-group functions to implement the global concept and achieve overall target set for the area,
- e) Continuously build up own competences to be able to fulfill the requirements as inspector in Bactoforce. Coach and train any employees (e.g. inspectors) to be able to perform inspections in accordance with the internal Bactoforce guidelines,
- f) Take responsibility for maintaining the condition of own inspection and safety equipment, incl. any vehicles,
- g) Participate in the sales and marketing of the services that the Employer offers to (potential) customers as may be required,
- h) Participate in building up and maintaining relationships with customers of the Employer, both concerning the performance of inspections and the follow up on inspections.
